**Note:** Pricing assumes that TWC has existing infrastructure in customer's location to service customer's request, and the service may not be available to all users. One-time costs is intended to resolve situations where facilities do not exist (off-net locations), and where construction to extend TWC facilities may be an option to delivering services to the customer location. Construction charges for off-net locations are determined by specific requirements, using cost information supplied annually to the NYS Office of Real Property. In the event that construction is required, and construction charges are a necessity, construction or one-time charges will not exceed \$500,000.
